Enhancing Impact of Library Instruction on Student Learning and Success

3-15-18

THE EXTRA WORK INVOLVED

It will be more for the LIB100 instructor than the content based class

- Your assignments will reflect their content, thereby enhancing their understanding of the subject learning valuable library skills and research tools.
- 2 meetings prior to start of the semester, and opportunities of communication between faculty
 - Pick someone who is receptive, otherwise the student will not get the connection and the learning concept will lose value
 - Initial meeting: Syllabus exchange and "getting to know your faculty" if you can
 - Second meeting: setting of assignments and what you will need each week
